

Anna heads home for My Feadship pampering ahead of summer season

Launched last summer, the beautiful 110-metre Feadship *Anna* is about to grace the shores of the Netherlands again. Making the most of the assets of the My Feadship programme, *Anna*'s owner and captain have decided to have various maintenance activities carried out by Feadship in Amsterdam before the giant superyacht heads off for a summer of adventures.

Just as Porsche drivers don't take their car to Peugeot for a service, Feadship owners are making the most of the new opportunities to have maintenance work carried out by Feadship or Feadship-authorized yards within the Feadship Services Network.

After enjoying a super maiden season in the Caribbean, *Anna* is now making her way back to the Netherlands where Feadship will carry out some minor works. The oyster-white Feadship will then embark on her first summer season of cruising.

"It is self-evident that the best place to have a refit or rebuild carried out is by Feadship or one of our four partner yards within the Feadship Services Network," comments Pier Posthuma de Boer, Director Refit & Services at Feadship. "We are pleased to see that an increasing number of Feadships are also benefiting from the added value of having us take care of maintenance work as well."
