

Project 700 sees the light of day

Until she is christened later this month, the 87-metre Feadship which has just come out of one of the construction halls at the yard in Aalsmeer will remain known as Project 700. Don't read anything into the 700 – it's simply the hull number, albeit admittedly a landmark one for the yard.

This striking 87-metre beauty is already outside so she can have various exterior elements added in advance of the official launch. What we can tell you for now is that her lovely exterior styling is by Sinot Exclusive Yacht Design, as is the interior, the latter in cooperation with Richard Hallberg Interior Design.

It's also a given that the accommodations for the owners and their twelve guests will be of the very highest standards, as will the service be by 27 crew.

Technical specifications

Project 700 Twin screw motor yacht, steel hull and superstructure
