

Feadship delivers *Stella M* – A refined new Feadship joins the fleet

Amsterdam, 11 August 2025 – Feadship is pleased to announce the delivery of *Stella M* to her owner on 5 August. Measuring 71.76 metres, this contemporary and forward-thinking Feadship reflects a clear vision of modern luxury.

Designed by Studio De Voogt, *Stella M* pairs elegant exterior lines with five decks of open, light-filled interior space. Her next-generation diesel-electric propulsion system supports quieter and cleaner cruising, building on Feadship's unmatched experience in hybrid innovation. The project was developed in close collaboration with Burgess, who represented the owner throughout the build, and Hugo-Morgan Harris as technical representative. The result is a yacht that combines impressive volume with refined styling and a layout tailored for multi-generational living.

"The successful delivery of *Stella M* reflects seamless collaboration between the owner, the yard, design teams, technical experts, and broker," says Maarten Janssen, Feadship Sales Director. "Every detail was shaped by a shared ambition to create something exceptional. Her advanced diesel-electric propulsion system has resulted in remarkably low noise and vibration levels, as confirmed during sea trials.

"The owner brought a clear vision and personal touch to the project, contributing thoughtfully throughout. *Stella M* is a refined and distinctive yacht, ready to begin her first Mediterranean season."

"We were pleased to support the owner on his build journey – from initial enquiry to delivery – and be a part of such an exceptional project," commented Richard Lambert, Senior Partner at Burgess. "Her Dutch pedigree coupled with complete collaboration between all parties resulted in vessel that meets the owner's forward-thinking vision."
